Project Outline

Anrich Potgieter

12-03-2022

Contents

1   Research area and working title

1.1   Research Area

1.1.1   Blockchain

1.2   Working Title

1.2.1   Connecting Blockchain of Blockchains to centralised systems and decentralised ledger systems

2   Abstract

(**belchiorSurveyBlockchainInteroperability2021**) state that "blockchains of blockchains are frameworks that provide reusable data, network consensus, incentive, and contract layers for the creation of application-specific blockchains (customized blockchains) that interoperate between each other."

3 Proposed Research Problem and Research Question

3.0.1 Research Problem

3.0.2 Research Questions

RQ1 Do the current cross-chain solutions provide mechanisms to connect to centralised and decentralised ledger systems?

4 Proposed Aims and Objectives

5 Proposed Research Design

Action research

I want to use action research.

6 Artefact/s that can be created
